DESCRIPTION

An Anchorage Fabric Wrapped Bass Trap is a low frequency bass absorber that answers your acoustical and aesthetic needs with their strong sound absorbing performance, durability and elegant appearance. Anchorage Bass Traps are available in 2' and 4' heights have a 12" depth.

The installation of these acoustical bass absorbers is quick and simple. They can simply rest on the floor in the corners or be adhered with a water based panel adhesive or Velcro.

The standard fabric selection is the Guilford of Maine Anchorage Acoustic Fabric. This fabric is easy to clean and comes in a variety of vibrant colors. These acoustical bass traps are class 1 fire-rated and are often used in the Broadcast and Recording Industries, Home Theaters and Houses of Worship.
