FEATURES

- Reduces echo and reverberation
- Low frequency absorption
- Exceptional acoustical performance
- Easy installation

DESCRIPTION

A SoundSuede™ Fabric Wrapped Bass Trap is a low frequency bass absorber covered in luxurious synthetic suede, which gives a premium finish to any room. The strong sound absorbing performance, durability and elegant appearance of SoundSuede™ Bass Traps makes them well suited for broadcast and recording studios, home theaters and houses of worship.

These class 1 fire rated bass traps will fit into a corner of a room and come in 2' and 4' heights and both have a 12" depth. The installation of these acoustical bass absorbers is quick and simple. They can simply rest on the floor in the corners or be adhered with water based panel adhesive or Velcro®.
