

GREEN GLUE NOISEPROOFING JOIST TAPE

DESCRIPTION

One of the biggest noise complaints in residential buildings is the sound of footsteps and squeaky floors. The squeaking that's driving you crazy occurs naturally when floors settle, and joists rub together with subflooring. There's an easy solution: Green Glue Noiseproofing Joist Tape. The tape creates an airtight seal and dampens foot traffic, so that annoying squeaking becomes a thing of the past.

Green Glue Noiseproofing Joist Tape comes in 100' rolls in three standard width sizes based on the most common joist sizes in new construction projects.

Rolling Green Glue Noiseproofing Joist Tape takes practically no time at all and can easily be incorporated into flooring jobs.

Green Glue Noiseproofing Joist Tape installs easily by hand. Simply roll or lay tape onto floor joists, adhesive side down, and install sub-flooring on top.

TECHNICAL CHARACTERISTICS

Thickness	1/8"
Widths	1 7/16", 2 1/8", 3"
Length	100'

FEATURES

- Easily applied by hand
- Three sizes available
- Improves energy efficiency

COMMON APPLICATIONS

- Residential
