

## WHISPER CLIP

### DESCRIPTION

Green Glue Whisper Clips separate drywall from the building studs to dramatically reduce sound transmission by allowing one wall to vibrate independently from the other.

Whisper Clips were designed for high STC and maximum low frequency sound isolation in mind, so walls fortified with our clips will eliminate the bass sounds most commonly found with home entertainment and theater systems.

Approximate Coverage: 1 Whisper™ Clip for every 5 feet pf wall or ceiling.

### TECHNICAL CHARACTERISTICS

Size	1¼" x 4¼" x 1"
Weight	.025 lbs

### FEATURES

- Easy installation with hat track
- Recommended load of 24-30lbs, or 2-3 drywall layers
- Max safe load of 46 lbs, or 4 drywall layers

### COMMON APPLICATIONS

- Commercial
- Industrial
- Sound Studios
- Residential
- Educational

### SOUND BLOCKING PERFORMANCE

First Side of Wall	Second Side of Wall	STC*
1 layer of ½" Drywall with Whisper Clips	1 layer of ½" Drywall	56
2 layers of ½" Drywall with Whisper Clips	1 layer of ½" Drywall	61
2 layers of ½" Drywall with Whisper Clips	2 layers of ½" Drywall	63

\*Sound Transmission Class (ratings calculated from wood stud R19 fiberglass insulated wall assemblies.)
