

**ALPHASORB<sup>®</sup> ANCHORAGE FABRIC WRAPPED BASS TRAP DATA SHEET**

**DESCRIPTION**

An AlphaSorb<sup>®</sup> Anchorage Fabric Wrapped Bass Trap is a low frequency bass absorber that answers your acoustical and aesthetic needs with strong sound absorbing performance, durability, and an elegant appearance. AlphaSorb<sup>®</sup> Anchorage Fabric Wrapped Bass Traps are available in 2' and 4' heights have a 12" depth.

The installation of these acoustical bass absorbers is quick and simple. They can simply rest on the floor in the corners or be adhered with a water based panel adhesive or Velcro<sup>®</sup>.

The standard fabric selection is the Guilford of Maine Anchorage Acoustic Fabric. This fabric is easy to clean and comes in a variety of vibrant colors. These acoustical bass traps are class 1 fire-rated and are often used in the Broadcast and Recording Industries, Home Theaters, and Houses of Worship.
