

DESKTOP MASKING SYSTEM DATA SHEET

APPLICATIONS

- Home Offices
- Small Waiting Areas
- Locations where it is difficult to install sound masking in the ceiling or plenum

FEATURES

- Localized speech privacy
- Install this product in the area needing noise masking
- Easy access to control
- Portable

INTENDED USE

Unit produces white noise to aid in masking sound for speech privacy

DESCRIPTION

The Desktop Sound Masking System generates sound masking and connect to Bluetooth devices for audio. High quality audio with “dome” dispersion — 360° plus upward sound to fill the room with sound masking or music.

Place it in the center of a room, in a corner, or on the floor and the sound will radiate around the room. High quality sound from advanced technology. Powerful transducer, digital signal processing, and a specialized acoustical deflector produce loud and crisp sound along with legendary sound masking technology — the most comfortable sound masking in the industry.

TECHNICAL INFORMATION
