

VersiPanel Jr Partition Wall

TECHNICAL CHARACTERISTICS

- SIZE:** 96" wide x 48" high
- THICKNESS:** 2-1/4"
- MATERIALS:** Fabric wrapped LDPE foam core
- FINISH:** Acoustically Ribbed Fabric
- FIRE RESISTANCE:** Class 1 per ASTM E 84
- COLORS:** Blue, Red
- MOUNTING:** Freestanding with optional VersiFoot Partition Stabilizers

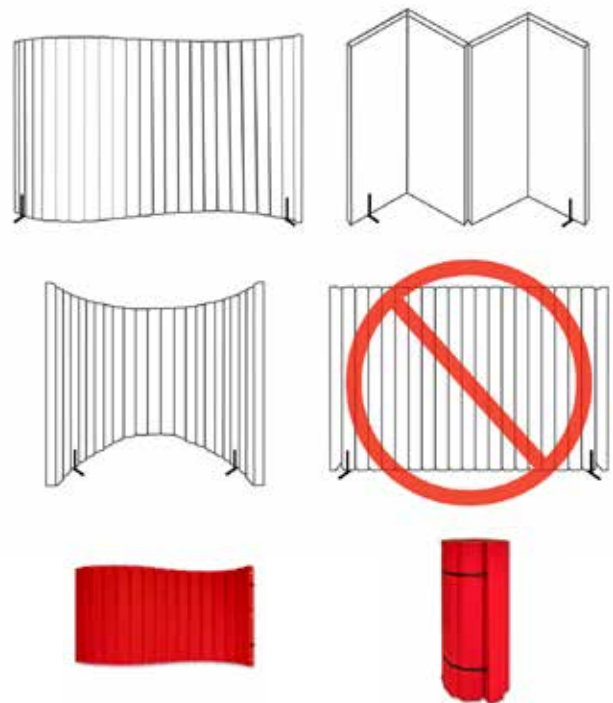

DESCRIPTION

Our VersiPanel Jr Partition Wall modular system is a configurable sound absorbing acoustic divider perfect for classroom settings. Easily create classroom or activity areas with these soft, brightly colored room dividers in daycare, nursery or preschool applications.

Our VersiPanel partitions are the only fabric covered, semi-rigid, free-standing panel you can bend and shape. This allows you to arrange the partition in a serpentine "S" shape. By adding a couple of optional VersiFoot accessories, you can create "C" or "L" shapes, often seen in recording or testing spaces. Unlike other partition walls, the VersiPanel meets the floor directly from end to end, limiting the passage of sound. Link several units together with the attached magnetic end pieces to create a larger partition.

Suggested Application for VersiFoot Stabilizers

SOUND ABSORPTION

125 Hz	250 Hz	500 Hz	1000 Hz	2000 Hz	4000 Hz	NRC
0.18	0.32	0.48	0.89	1.01	0.99	0.65
