

ALPHASORB[®] DESIGNER COLORS INDOOR/OUTDOOR WALL BAFFLE DATA SHEET

DESCRIPTION

Alphasorb[®] Designer Colors Indoor/Outdoor Sound Absorbing Panels are the perfect solution to reverberation issues for large spaces. Our weather-resistant acoustical wall panels make it possible to have beautiful outdoor spaces with great sound quality. Each panel is 2" thick and has an NRC (Noise Reduction Coefficient) rating of 0.70. They are highly effective in absorbing sound waves, to reduce echoes and reverb, and creating more comfortable interior or exterior environments.

What sets them apart is their visual appeal and versatility. Our exterior sound absorbing panels offer superior sound absorption in twelve vibrant colors. You can customize the exact dimensions to suit your space, with sizes available up to 4 feet by 10 feet. They're also simple to install thanks to the built-in stainless-steel grommets.

Whether you're running a restaurant with outdoor dining spaces, managing a music venue, or operating a crowded amusement park, these wall baffles will make a noticeable difference in noise reduction. Say goodbye to the distracting and unpleasant noise that often accompanies outdoor settings.
